# RUKU1952 Folding Furniture

The term 'folding furniture' may call to mind plastic card tables or metal yard chairs. With origins rooted in European beer gardens, we've modernized folding furniture to offer mobility without sacrificing quality or charm. Our table sets fold and stack, move and store effortlessly for convenient business solutions.

Outfit your restaurant, brewery, or industrial design project with your selection of our signature table styles or a custom design request.

## In-House Design & Manufacturing

We've built, tested, and designed folding furniture since 1952. In that time, we've literally patented quality construction while developing signature styles. We also look to give back through sustainable practices like our annual reforestation program and solar-powered production.

## Hand-Crafted Quality, Direct from the Manufacturer

**Great quality starts with great materials and ends with attention to detail.**

Each RUKU1952 table and bench set begins with meticulously selected spruce, oak, or aspen spruce wood that's reviewed for integrity and imperfections. After months of drying and treatment, that wood is cut, shaped, and repeatedly varnished with quality checks at each step along the way.

Wooden table and bench tops pair with metal finishes - like our patented trapezoid beer garden table base frames and folding backrest bench structures. A powder-coated finish not only locks out rust, but also provides a glossy, colored finish.

## Community Approved

“Catawba Riverkeeper’s River Room taproom has been using RUKU1952 furniture since October 2022 and are very happy with the quality, durability and mobility of both the tables and benches. We have this seating both outside on our patio and inside and they create a warm and casual atmosphere which we can easily dress up for events.”
